

# Get your killed Anaplasmosis vaccine through CCA and ensure your herd is protected!

Ticks and flies are a problem at many times of the year.  
Don't leave your cattle at risk!

The older cows get, the more they are affected by this costly disease! The killed anaplasmosis vaccine protects cows and bulls of any age from infection.

The killed vaccine is now available to CCA members at a discounted rate!

Order 10-50 doses, the cost is \$8.50/dose,  
order 60 or more doses and get each for only \$7.50!

*Doses are available in increments of 10.  
If you need to vaccinate 25 head, you need to order 30 doses.  
But, if you are vaccinating for the first time, and buy enough vaccine for the required booster 3-4 weeks after initial vaccination, buying 50 doses would get you the correct number of doses at an additional discount!*

For more information, contact the CCA office at (916) 444-0845.

To order, send in this form, complete with your billing, shipping and order request. It's that easy!
